Both, your Mar 5 notes on shrinkery:Thanks to you I can see two other possible uses for all of this quackery, especially the stuff on Segal. One is in connection with the "evaluations" of Oswald and the second is a potential in our damage suit. One of the more likely sources of government "expert" witnesses if the National Institute of Mental Health. So, anything that can crumble those cookies on the witness stand could be of some real usefulness at that time. If you don t see Military Medicine perhaps Howard's library has it. If you don't have it, I'll ask him for two copies, one for you. Aside from its separate merit, the fine Sterba piece relates to this. If the piece was killed ot changes, I hope Howe kept his. Crack-of-the-mont is rhyming thinking with Finck-ing! HW 3/12/73
